

TECHNICAL DATA SHEET

VIA Tile Soap

Care soap based on natural fatty acids for cement-bound floors

VIA Tile Soap is a soap concentrate based on natural fatty acids for the routine care of cement-bound floors. It cleans gently and with every application builds up a thin, dirt-repellent and slip-resistant soap film with a silky sheen.

The soap film is not a coating system but a care layer that becomes denser with repetition. A newly laid floor therefore appears increasingly closed and less sensitive after the first few care cycles. The film can be polished and refreshed at any time.

PRODUCT

Properties

- Based on natural fatty acids
- Biodegradable
- Forms a dirt-repellent silk-gloss film
- Slip-resistant
- Can be polished
- Suitable for scrubber driers
- For cement tiles, terrazzo and natural stone

TECHNICAL DATA

Technical Data

Product type	Soap concentrate
Colour	yellow
Odour	soapy
pH value	9 to 10
Delivery viscosity DIN 4 mm	approx. 15 s
Packaging	1000 ml bottle
Shelf life	at least 2 years
Ingredients	5 to 15 % soap, less than 5 % anionic surfactants, colourants and perfume

APPLICATION

Dosage

APPLICATION	DOSAGE	DILUTION
Routine cleaning by hand	10 to 20 ml per 10 l	1:50 to 1:100
Scrubber drier	20 to 30 ml per 10 l	up to 1:150
Initial care, new surface	20 ml per 10 l	1:50

Use lukewarm, clean water. Mop the surface damp, not wet. Standing water must be avoided on cement-bound floors under all circumstances.

CARE

Initial Care and Maintenance

- 1 Initial care**
 After the surface treatment, mop the area several times at intervals of one day at a dosage of 20 ml per 10 l. Three to five cycles build up the base film.
- 2 Routine cleaning**
 Mop damp on an ongoing basis with 10 to 20 ml per 10 l. Change the mopping water frequently.
- 3 Polishing**
 If required, polish the dry surface with a single-disc machine and a white pad. The sheen increases as a result.
- 4 Refreshing**
 Heavily used areas can be treated individually at any time.

IMPORTANT INFORMATION

Important Information

- Do not use acidic, strongly alkaline or abrasive cleaners.
- Do not use steam cleaners.
- Do not apply undiluted to the surface, this causes streaks and haze.
- On oiled floors use only after the oil has fully cured, at the earliest eight to ten days after oiling.
- Store closed and frost-free.
- Test the effect on an inconspicuous area before use.

SAFETY

Labelling**Warning**

Classification

Skin Irrit. 2, Eye Irrit. 2

H315

Causes skin irritation.

H319

Causes serious eye irritation.

The classification refers to the undiluted concentrate. Further information is given in the safety data sheet for VIA Tile Soap.
